

GAS GENERATOR SOLUTIONS

FOR SMALL OR MID-RANGE ELECTRONIC SYSTEMS

› INTEGRITY SINGLE-PHASE POWER CONDITIONER

Gas Generator Solutions has partnered with NXT Power to bring you its Single-Phase 208/240V Power Conditioners line. Offering the cleanest power available in a single-phase power conditioner, NXT Power's Integrity power conditioner is ideal for mass spectrometers, analytical instrumentation, small- or mid-range computer systems, and other critical electronic systems with high inrush current peripherals and high crest factors or applications that require dual voltage and 2-10 kVA of power.

EXPERIENCE SUPERIOR POWER PROTECTION

When electrical noise is generated on the line or by the load, NXT Power's low impedance isolation transformer protects your system from all potential power disturbances problems that can result in the loss of priceless data, unforeseen downtime, sophisticated equipment damage, and expensive service calls.

SUITABLE FOR USE WITH:

- › Analytical instrumentation
- › Mass spectrometry & chromatography equipment
- › Computer and network systems
- › Computer controlled equipment
- › Other small-to-mid range electrical systems

SUPERIOR POWER PROTECTION BENEFITS & FEATURES

- Help your customers protect their electronic systems and ensure uptime all day, every day.
- Enjoy peace of mind knowing equipment is protected from problems due to common-mode voltage, power outages, spikes and transients, and more.
- Let through voltage is less than 10 volts normal mode and less than 0.5 volts. Neutral-to-ground when tested to ANSI/IEEE C62.41, Category A&B.
- Product line options are from 2 kVA to 7 kVA.
- Provides clean power at 208 or 240 VAC input and 208/240/120 VAC output for loads up to 29 amps.
